"We have 61 Country daughters milking and more to calve this fall. They are milking exceptionally well. One calved with her second calf in April and had 80 pounds of milk on first test. They are strong, clean milking cows with good feet and legs, high wide rear udders with good teat placement. We have used him heavily and plan to keep on using him. They are the right kind for us."

- John Rankin of Cedarcrest Farms, Faunsdale, Alabama, USA

"The Seville daughters impressed me with great rear udder height and rear udder width. They were balanced, flat-boned cows that have the will to milk. He is the bull to use for longevity."

- Aaron Henderson of Real Genetics, Astoria, Oregon, USA

Watch for Seville's release as well as his first proof, with August's genetic evaluation.

BW Seville is already being requested for use in herds comprising over 5,000 cows in several states before his first official proof!
